of the Sendai Framework (2015-2030), progress against six of the seven targets – barring Target E on plans and strategies – is far from satisfactory. This has important implications for the achievement of at least half of the SDGs. Disaster risk reduction needs to be an integral part of the development strategy of a country if its ambitions for economic growth, prosperity, and sustainable human development are to be realised.

Recognizing the need for pursuing disaster risk reduction with a sense of urgency – not only for the benefit of G20 members but for the entire world – a new G20 Working Group on Disaster Risk Reduction was established under the Sherpa track during the Indian presidency.

The Working Group met for the first time in Gandhinagar and agreed on five priorities: working towards global coverage of early warning systems for all hydro-meteorological disasters; investing in disaster and climate-resilient infrastructure; improving national financing frameworks for disaster risk reduction; improving systems and capabilities for post-disaster response and recovery including "build back better"; and application of ecosystem-based approaches to counter the risk of disasters.

The second meeting of the Disaster Risk Reduction Working Group was held in Mumbai in May where

officials came together to discuss different dimensions of financing for disaster risk reduction. They delved into challenges in ensuring that the entire spectrum of disaster risk reduction needs – disaster risk mitigation, preparedness, disaster response, and disaster recovery are appropriately financed, and lead to measurable outcomes in the form of reduced disaster risk and losses. In India, we have instituted wide-ranging reforms in this regard, and we stand ready to not only share our experience but also learn from innovations that other countries have brought about.

While we are in the process of preparing for the third and final meeting of the Disaster Risk Reduction Working Group, I propose five issues that may be considered during future discussions:

First, we need to enlarge the discussion on financing. This includes exploring innovative financing tools such as reserve funds, dedicated lines of credit, and global resource mobilisation to supplement government budgets that may be constrained due to fiscal positions. Insurance and risk pooling solutions must be an integral part of this discussion. Countries that have a growing focus on capital expenditure require additional resources, capacities, and technologies to ensure that all new infrastructure assets are disaster and climate-resilient.

Working Group. This will ensure sustained engagement on a three-year road map for the Disaster Risk Reduction Athel Mumbarai meeting, the G20 members also deliberated

to manage unforesseen risks effectively.

Finally, adopting a multi-tiered and multi-sectoral approach to disaster risk reduction, integrating efforts vertically from local to global levels, and horizontally across sectors will significantly enhance our preparedness to manage unforeseen risks effectively.

And the G20 can lead by establishing an appropriate early warning for all should serve as a guiding principle, implementing the UN Secretary General's initiative for populations, regardless of their economic strength, be considered a global public good available to all groups. ## Working Group

### 3rd Meeting

MAY 22-24 |

The third meeting of the Tourism Working Group was hosted amidst the ethereal valley of Kashmir in Srinagar. As a destination that offers immense potential in the tourism sector, Srinagar was perfectly placed to further high quality discussions from national and international delegates and experts for accelerating the transition of the tourism sector and achieving the targets for 2030 Sustainable Development Goals. Under India's G20 Tourism Track, the Tourism Working Group is working on five inter-connected

Sustainable Development Goals and G20 Tourism Ministers' Declaration. The final versions of these drafts will be placed in the fourth meeting of the Tourism Ministers' Decaration. The final version of these drafts meeting from June 21-22, 2023 to be hosted in Goa.

## Y20 CONSULTATION

MAY 10-11, 2023 | SRINAGAR

**"The vision of India's G20 Presidency is the vision for the future of humanity. 'One Earth, One Family, One Future' is a vision of shared responsibility to courageously tackle the two great challenges of the next 25 years - protecting the climate & promoting sustainable development"**

**Manoj Sinha**

Lieutenant Governor of Jammu & Kashmir

### THEME

#### Climate Change and Disaster Risk Reduction: Making Sustainability a Way of Life

17 youth delegates from G20 members like Indonesia, Mexico, Turkey, Russia, Japan, Republic of Korea, United States, Brazil and Nigeria participated in the two-day Y20 Consultation at University of Kashmir in Srinagar, Jammu and Kashmir.

### Plenary Sessions

Impact of Climate Change on Biodiversity & Human Well-being

Disaster Risk Reduction for a Safe Tomorrow

Green Energy - Innovations & Opportunities

Water Resources Challenges & Prospects

The vision for inclusive science advice is rooted in the belief that the benefits of scientific progress should reach every segment of society, through appropriate policy improvement. Science and Technology (S&T) have the power to bridge gaps, empower communities, and address pressing social challenges such as poverty, health-care disparities, and climate change. Therefore, it is crucial to ensure that the policy advice provided by the Chief Science Adviser reflects the diverse needs and perspectives of all stakeholders, including women, indigenous communities, and underprivileged sections of society across nations.

The G20-CSAR initiative provides a valuable platform for governments to engage in discussions on critical themes at the policy level. During India's Presidency, G20-CSAR has fixed its collective priorities on themes such as One Health, Open Access to Scholarly Scientific Knowledge, Diversity, Equity, Inclusion, and Accessibility in Science & Technology. One of the key objectives of this initiative is also to ensure that there is a continuous effort to create robust institutional mechanisms for continuous embedding within the highest level of governance and The Chief Science Advisers and their equivalents are discussed some of the critical issues related to scientific research, technology development and deployment. The G20 produces approximately 85% of global scientific knowledge. It serves as an effective platform to discuss some of the critical issues related to scientific research, technology development and deployment.

**Prof Ajay Kumar Sood**

## Towards Inclusive Science Advice for Global Policy Making

by providing evidence-driven science advice.

and action-oriented Global S&T Policy Dialogue.

It is widely recognized that in the spirit of cooperation and dialogue, Chief Science Advisers, who provide scientific advice to the heads of the states on all major policy matters, have a responsibility to also engage in addressing transboundary issues that impact the global scientific enterprise. G20-CSAR as a platform aims to

foster meaningful dialogue and cooperation. Looking ahead, we can ensure that advancements in science and technology have a broad and inclusive impact. Through these collaborative efforts, we can harness the power of scientific knowledge to effectively address shared challenges, enhance global scientific progress, and foster a more equitable and prosperous future for all. ■

# G20 ENERGY

**E**nergy has been a critical element of G20 since 2009 for a sustainable global economy, and India has assumed its historic G20 Presidency at a time when the world is amid the first global energy crisis, world economy shaken by a global pandemic, tragic conflict in Ukraine and its aftermath of rising energy costs, and declining energy security. The present geopolitical situation just highlights how Energy security has risen to the forefront of countries' agendas, as each looks to secure affordable energy supplies to fuel their economies. At the same time, there is greater recognition that to avoid dangerous climate change, countries need to rapidly accelerate the decarbonisation of our economies, including transforming how we generate and use energy. Hence, energy transition plays a crucial role in achieving the net zero targets and pushing for a clean energy future.

Energy Transition Working Group (ETWG) under India's G20 Presidency recently completed its 3rd meeting successfully in May 2023 at the Jio Convention Centre, Mumbai. The three-day meeting was chaired by Secretary, Ministry of Power & witnessed participation of over 100 delegates from G20 member countries, special invitee countries and International Organisations such as World Bank, ADB, World Economic Forum, UNDP, IEA, OPEC, ISA, IRENA, UNESCAP, UNIDO & UNEP.

The primary agenda of the 3rd ETWG meeting was to conduct detailed discussions on the draft Ministerial Communiqué and constructive deliberations on priority areas, with Member countries presenting their respective viewpoints, on areas like Fuels for Future (Green Hydrogen being the centre of discussion); Universal access to clean, affordable and inclusive energy transition pathways (national priorities playing a pivotal role in bringing a common consensus); Diversified supply chain and critical minerals (shift the dependency from one country to avoid supply chain bottlenecks) etc. On the side-lines, the three-day meeting was well complemented by eight Side Events (Workshop with MDBs with the aim of mobilizing low-cost international finance; Seminar on Biofuels, Off-shore wind

**"G20 nations hold a unique responsibility to lead the way towards a sustainable future"**

**Raosaheb Patil Danve**

# Six Months of Action-Oriented Presidency

**Harsh Vardhan Shringla**

India's G20 Chief Coordinator

**3** 1st May was a defining moment in India's year-long G20 Presidency. India has crossed the halfway mark of a journey that symbolically began with Indonesian President Joko Widodo handing the gavel to Prime Minister Narendra Modi at Bali on November 16, 2022.

Since then, India has been the focus of global attention – with countries looking to the "Mother of Democracy" to find solutions for a multitude of crises bedeviling the world. And, we in India – 1.4 billion Indians – were more than willing to take on the task, readily welcoming the world to join us in the spirit of 'One Earth, One Family, One Future'.

## Over 120 meetings in 50 cities

The ambitious goal of hosting more than 216 G20-related

Journey 2023: Voice of Global South Summit

meetings in about 60 cities seemed a bit challenging, when India initially took on the G20 Presidency six months ago on December 01, 2022.

To assume the Presidency of one of the most significant multilateral forums in the world and to conduct its meetings at an unprecedented scale was an ambitious goal – especially coming as it did, after the havoc wreaked by the pandemic.

Today, India can say with some satisfaction – as we look back over the past 6 months of our G20 Presidency, that we have successfully organized and concluded over 120 meetings with some substantial outcomes.

In this journey, we were encouraged by our Prime Minister Shri Narendra Modi's confident leadership. We were galvanized by his belief that a geographically, linguistically and culturally diverse country such as India has much to offer to the world. India's example of leveraging diversity as strength can potentially show the world a way out of an endless stream

December 2022: ISG Meeting, Udaipur

The G20 Finance Ministers and Central Bank Governors Meeting addressed many critical economic issues in its Chair Summary and Outcome Document. On toppling up, climate finance, the document reaffirmed the commitment made by developed countries to the goal of mobilizing USD 100 billion climate finance per year by 2020 and annually through 2025, to address the needs of developing countries. Additionally, there was a clear recognition of the urgent need to address debt

to finding ways to counter terrorism and narcotics. Skill Mapping referred to better integration of workers from greater G20 cooperation with Africa and from global skill mapping. Meeting contained wide-ranging outcomes from recognizing the need for multilateral reforms to calls for foreign ministers to come together and "focus on what divides us, but on what unites us".

Modis addressed to the gathering included an earnest appeal to all G20 countries to come together and "focus on what divides us, but on what unites us". Models' commitment to an "inclusive" Presidency. At the start of the G20 Foreign Ministers' meeting, Prime Minister Narendra Modi's voice at the G20 meetings was a testimony to India's commitment of an "inclusive" Presidency. At the start of their voice at the G20 meetings was a testimony to India's

Raising the concerns of the Global South, amplifying at the global high table for economic issues. Global South and made sure that these found resonance at the gathering, India highlighted problems faced by the Central Bank Governors in February. At both the G20 preceded by a meeting of G20 Finance Ministers and of Foreign Ministers under a G20 Presidency. This was largest ever gathering of Foreign Ministers

In March 2023, India hosted the largest ever gathering of challenges that disrupt our endeavors to achieve prosperity today.

vulnerabilities in low and middle-income countries.

### Becoming the voice of the Global South

During its Presidency, India has strongly promoted the role of Digital Public Infrastructure (DPI) in powering economic growth in the countries of the Global South and making significant strides in areas such as health, education, e-commerce and financial inclusion. To advance this conviction, the Digital Economy Working Group has focused on mobilizing G20 members to finance, design, build and regulate inclusive, inter-operable and secure DPIs.

Today, we hear louder calls from the Global South for reinvigorated multilateralism to make global governance more representative, effective, transparent and accountable. Under India's G20 Presidency, the concerns of the Global South are being highlighted quite strongly as developing countries face significant barriers in realising their developmental goals owing to greater vulnerabilities in the context of climate change, unsustainable debt, and food, fuel, fertilizer insecurity. In his remarks at the India-Pacific Islands Cooperation (FIPIC) Summit in Papua New Guinea, Prime Minister Narendra Modi stated that "India considers it a responsibility to bring the issues, expectations and aspirations of the Global South to the

attention of the world through the G20 platform".

### Advancing Food Security

With global food security concerns exacerbated by climate change, the 100th meeting under India's G20 Presidency – the Meeting of Agricultural Chief Scientists – brought India's traditional superfood – millets – in focus with the launch of the "Millets And OtHer Ancient GRains International ReSeArch Initiative (MAHARISHI)".

India, the largest producer of millets in the world, has responsibly spearheaded this initiative to facilitate research and collaboration on these climate-resilient and nutritious grains. Being more water-efficient, pest-resistant, heat-tolerant, millets are also less dependent on synthetic fertilizers and pesticides, making them good for the environment, people and farmers simultaneously.

### New Initiatives

Resilient, inclusive and sustainable growth is the guiding light for India's G20 Presidency, which has prompted India to initiate a new workstream for Disaster Risk Reduction. According to the World Meteorological Organization, extreme weather events of the last 50 years have cost the world over two million deaths and \$4.3 trillion in economic losses. The key idea behind this workstream

April 2023: Tourism Working Group Meeting, Darjeeling

As India embarks on the next crucial six months of its G20 Presidency, starting with many ministerial level meetings this month, we look forward to many more tangible outcomes that will deliver on our promise of an "action-oriented" G20 Presidency. ■

**“About by collective effort”**

At a meeting of the G20 Presidency last month, Prime Minister Narendra Modi said, “the biggest challenge can be brought about by collective effort.”

The emphasis on oneness and unity has been the hallmark of India’s G20 Presidency, as stated by Prime Minister Narendra Modi in the 100th episode of Mann ki Baat, where he said, “the biggest challenge can be brought about by collective effort.”

Our Presidency is working steadfastly to ensure long-lasting solutions, using technology on a humanity-wide scale and creating avenues for better collaboration to foster research and development.

Our overarching aim has been to unite the world on issues of global importance with a human-centric approach, as Prime Minister Narendra Modi put it.

In the past six months, India has organized more than 120 meetings under its G20 Presidency.

## Looking Forward

# Environment, Climate & Sustainability Working Group

## 3rd Meeting

MAY 21-23, 2023

**Leena Nandan**

Secretary, Ministry of Environment,  
Forests & Climate Change

The third meeting of G20 Environment and Climate Sustainability Working Group (ECSWG) took place in Mumbai from May 21-23, 2023. The three-day meeting was attended by 141 delegates from G20 countries and 10 invitee countries. The representatives of 14 international organisations were also a part of the deliberations.

Each of the previous two meetings were focussed on a specific priority area and were supported by a side event. The 3rd ECSWG focussed on Blue Economy with two side events – Mega Beach Clean Up and the Ocean 20 Dialogue on Day 1 of the meeting.

The purpose of the Mega Beach Clean Up event was to sensitise and raise awareness about the impact of marine waste on the environment and encourage people to take action for preventing the same. The importance

***"Through the beach clean up event, we want to give this message to the whole world that every action of ours should be environment friendly"***

**Eknath Shinde**  
Chief Minister of Maharashtra

(LIFE). The beach cleaning was not only a manifestation of sustainable coastal management and ocean economy, but also was a demonstration of how individual and community actions can have an impact even on marine ecosystems due to human activity, and harms the biodiversity of the oceans. It resonates with the call to action under the Litter which is caused because of plastic that goes into the oceans, namely Argentina, Australia, Canada, Germany, Indonesia, Japan, Mexico, Republic of Korea, Russia, Saudi Arabia, South Africa, Turkey, United Kingdom and the United States covering 37 Indian beaches from the coastal states and Union Territories. The event in Juhu attended by the G20 delegates of the 3rd ECGW meeting showcased the power of collective action in addressing the global issue of marine pollution. Some of the activities undertaken included the pledge wall where the participants pledged to conserve oceans and coasts and committed to take action against ocean pollution. Painting competitions by Pancchayati Raj Union Minister of State for Kapil Moreswar Patil

mitigating this environmental challenge was highlighted of individual efforts and community participation in mitigating this environmental challenge was highlighted

#### | Beach Clean Up in Australia

(LIFE). The beach cleaning was not only a manifestation of sustainable coastal management and ocean economy,

children to show the effects of marine pollution, marine animal conservation awareness campaigns, and plastic recycling efforts, were some of the other activities.

To give a significant boost to the initiative, the Mega Beach Clean Up activity at Juhu was attended by esteemed personalities: Shri Bhupender Yadav, the Union Minister for Environment, Forest and Climate Change (MoEFCC), and Labour and Employment took part in the signature event, accompanied by distinguished guests including the Governor of Maharashtra Shri Ramesh Bais; Chief Minister of Maharashtra Shri Eknath Shinde; Minister of State for Environment Forest and Climate Change, Shri Ashwini Kumar Choubey Shri Mangal Prabhat Lodha, Minister of the Government of Maharashtra along with senior officials from both centre and the state government and G20 delegates.

| Delegates at Juhu Beach for Beach Clean Up

The dignitaries along with volunteers and delegates engaged in beach clean-up activity. The beach selfie point garnered significant attention, offering a picturesque backdrop for capturing memorable moments. The stall showcasing recycled items made from plastic served as a noteworthy attraction. The stall displayed benches, car dustbins and various other products crafted from recycled plastic. The renowned sand artist, Sudarsan Pattnaik, skilfully crafted a captivating sand art installation on the beach aligning it perfectly with the event's theme. The

| Sand Art at Juhu Beach

artwork prominently featured the G20 logo alongside Prakriti, the mascot for LiFE, symbolising the importance of sustainable living. The event showcased a collection of paintings created by approximately 5900 school students from across the country. These young artists participated in an art competition centred around the theme of coastal and marine pollution, of which 100 paintings were thoughtfully selected and displayed at the venue.

With an enthusiastic turnout of nearly 16,000 volunteers from across the country, the Mega Beach Clean Up demonstrated the power of individual actions in making a tangible difference. The second side event of the day, the Ocean 20 Dialogue emerged as a valuable platform for knowledge sharing and served as a guiding light towards a sustainable and climate-resilient Blue Economy. International experts, innovators, policy makers and industry leaders came together to engage in fruitful discussions on various crucial aspects, building on the preparatory work being done under India's G20 Presidency. The three pillars of Ocean 20 Dialogue, emerging science & technology, and innovation driven solutions, addressing challenges associated with effective policy and governance, and establishing finance mechanisms to support national and regional Blue Economy initiatives were discussed. Challenges such as

# Accelerating Innovation

## The Case and Importance of Global R&D Collaboration in Healthcare, Pharma & Med-Tech Sector

S. Aparna

Secretary,

Department of Pharmaceuticals

The 21st century has been marred by multiple outbreaks of epidemics and pandemics including Ebola, Nipah virus, H1N1, Avian Influenza, Japanese encephalitis, Middle East respiratory syndrome coronavirus (MERS CoV), Chikungunya, Dengue, and Severe Acute Respiratory Syndrome (SARS) causing disruption on social & economic fronts globally. These disease outbreaks highlighted the fragility of global supply chains along with the challenges of inequitable access, availability, and affordability of quality Medical Countermeasures [vaccines, Therapeutics and Diagnostics (VTDs)] across the world, but more particularly in low-and middle-income countries (LMICs). The rapid spread of the virus across borders demonstrated that a localized approach is insufficient in combating a highly contagious and rapidly evolving pathogen. As the world grappled with the devastating consequences of health emergencies, it became clear that accelerating innovation through research and development (R&D) collaboration is paramount. By harnessing the collective knowledge, resources, and expertise of nations, we can strengthen pandemic prevention and preparedness, leading to more effective responses and safeguarding global health.

Global R&D collaboration is essential to understand the pathogen, develop effective diagnostics, therapeutics, and vaccines, and devise strategies for managing future health emergencies.

### Need for Global R&D Collaboration

Innovation in healthcare, pharmaceuticals, and medical technology has been instrumental in improving human health and saving lives. However, the pace of progress can be hindered by challenges such as resource constraints, regulatory hurdles, and complex research processes. To overcome these obstacles and unlock the full potential of innovation, global collaboration in research and

One Future; During various meetings under the Health Working Group (HWG), the focus has been on the Global medical countermasures (MCMS) platform and VTDs, R&D and Manufacturers' Networks. This is a continuation of the agenda from Indonesia's G20 Presidency, initiated by Italy during its G20 Presidency.

Under second priority of the Health Working Group - Strengthening cooperation in the pharmaceutical sector, with focus on access to and availability of safe, effective, quality and affordable medical countermeasures such as vaccines, therapeutics and diagnostics, the Department of Pharmaceuticals, therapeutics and diagnostics under the Ministry of Health has taken various initiatives including of Pharmaceuticals and Medical Devices, Research and Development (R&D) and Manufacturing Networks. This is a continuation of the agenda from Indonesia's G20 Presidency, initiated by Italy during its G20 Presidency.

## Pillars of the Global R&D Network

Despite numerous challenges during the pandemic, it was effectively demonstrated that collective innovation, such as ACT Accelerator, Oxford-AstraZeneca collaboration, and solutions for R&D, technology, manufacturing, end-to-end distribution, and for enhancing prevention, preparedness, and resilience to health emergencies, can help in accelerating timelines to provide end-to-end solutions for R&D, technology, manufacturing, and solutions for R&D, technology, manufacturing, and distribution, and for enhancing prevention, preparedness, and resilience to combat emerging diseases. By establishing global healthcare ecosystem to think beyond physical boundaries and reinforce coordination and preparedness, the state of the world is better place for all.

India, known as the pharmacy of the world, supports the idea of streamlining all R&D initiatives in a structured and cohesive manner under a global R&D network to foster an environment of enhanced collaboration for effective cohesiveness in R&D across verticals like vaccines, therapeutics & diagnostics, to build strong industry-customer relationships and enhance R&D ecosystem.

## 3rd Meeting

APRIL 09-11, 2023

The 3rd Development Working Group Meeting was held in the vibrant state of Goa. Over 80 delegates from G20 members, 9 invitee countries, and various international and regional organizations participated. The meeting was inaugurated by the Secretary (Economic Relations) of the Ministry of External Affairs Shri Dammu Ravi. The meeting was chaired by India's DWG Co-Chairs – Ministry of External Affairs Joint Secretaries Mr K Nagaraj Naidu and Ms Eenam Gambhir.

The three-day meeting witnessed extensive deliberations on various development priorities proposed by India along with the G20 Action Plan to Accelerate Progress on the Sustainable Development Goals, and the G20 High-level Principles on Lifestyle for Environment. These discussions are essential in providing the necessary political thrust and momentum to the efforts on achieving the 2030 Agenda. ■

Exhibition of India's Journey to G20

**G20: United against Fugitive Economic Offenders**

The Buenos Aires G20 Summit in 2018, Honorable Prime Minister of India Shri Narendra Modi put forth the Nine Point Agenda for Action against Fugitive Economic Offenders. The impact of economic offenses such as money laundering, banking fraud and tax evasion on national and global economies is serious. These crimes pose a major threat to financial and fiscal sustainability of a country. There are several cases of economic offenses that involve deliberate corporate debt overhang and default-in-repayment-of-bank-loans. The magnitude of these offenses has the potential of undermining the resilience of the banking sector and draining public resources. Large sums of money that get diverted further recovery of their illicit assets more challenging.

This makes the return of fugitive economic offenders and legal processes and mechanisms to deny safe haven to all fugitive economic offenders, effective implementation of international commitments, establishment of intergovernmental cooperation for timely and comprehensive exchange of information, formulation of a standard definition of fugitive economic offenders, development of a common platform for sharing experiences and best practices and initiation of work on location properties of economic offenders who have a tax debt in the country or their residence for its recovery. The basis of India's strong practical and effective results regarding enhancement of international cooperation in corruption and Economic crimes, Offerers and Recoveries of Stolen Assets.

Offerers through the Fugitive Economic Offenders Act 2018 and strengthen will-to-political leadership to achieve objectives that links between corruption and other economic crimes and through cooperation in combating corruption and the implementation of a standard definition of fugitive economic offenders.

Offerers through the Nine Point Agenda, India drew the attention of individuals committing grave offences and fleeing from the jurisdiction of courts in their countries, thereby jeopardizing the criminal procedures often taken by safe havens abroad and escape punitive legal action. The processes for extradition of the accused, and tracking them. These fugitive Economic Offenders often take refuge in safe havens abroad and involve complex legal procedures, attaching and preparing the proceeds of such crime to the safe havens of逃亡犯.

Group (ACWG) meetings, India along with international organisations like OECD, UNODC, FATF and World Bank and fellow G20 countries, finalised a Scoping paper and a G20 Action paper on International Cooperation dealing with Economic Crimes, Offenders and Recovery of Stolen Assets; and G20 Action Paper on International Cooperation on Corruption and Economic Crimes, Offenders and Recovery of Stolen Assets. In 2021, India as co-chair of G20 ACWG played a key role along with other G20 countries and International Organizations in presenting the five think pieces related to Asset Recovery, Information Sharing, Law Enforcement Cooperation, Technology and Denial of Safe Haven. These efforts have led to the subject of International Cooperation dealing with Economic Crimes, Offenders and Recovery of Stolen Assets being identified as a substantive priority for future work of G20 ACWG, and hence becoming a part of Action Plan for G20 ACWG for 2022-24.

Despite the existence of international legal frameworks and mechanisms against Fugitive Economic Offenders, there is a need for further strengthening of international cooperation. It is imperative that all countries adhere to the gamut of applicable international obligations relevant to economic crimes. Appropriate mechanisms ought to be available within domestic legal systems to overcome the obstacles that may arise, for example, out of bank secrecy laws. The objective is to send a strong signal that corruption in any form is unacceptable and that G20 members deny safe haven to all those who engage in such behaviour, irrespective of their country of origin. G20 countries should provide maximum assistance to each other and reduce the compliance

Ministry of Culture

### Embracing Diversity and Fostering Inclusivity

India assumed the G20 Presidency on December 1, 2022, enunciating the theme of 'Vasudhaiva Kutumbakam' or 'One Earth, One Family, One Future'. India's G20 theme spotlights LiFE (Lifestyle for Environment), with its associated environmentally sustainable and responsible choices, both at the level of individual lifestyles as well as national development. The Culture Working Group is predicated on 'Culture for LiFE' as an initiative for environmentally conscious lifestyle and a concerted action towards sustainability. The Culture Working Group has been working towards achieving consensus and strengthening cooperation on four key priority areas - Protection and Restitution of Cultural Property, Harnessing Living Heritage for a Sustainable Future, Promotion of Cultural and Creative Industries and Creative Economy, and Leveraging Digital Technologies for Protection and Promotion of Culture.

The 2nd meeting of the Culture Working Group under India's G20 presidency was organised from May 14-17, 2023 in Bhubaneswar, Odisha, with the participation of representatives from G20 members, guest nations, and several international organisations. Building upon the 1st meeting of the Culture Working Group held in Khajuraho, Madhya Pradesh, and the four expert-driven Global Thematic Webinars in March-April, the 2nd meeting of Culture Working Group took forward the discussion on the four priorities to establish the framework for future cooperation and joint initiatives.

Priorities 1 and 2 focused on Priority 1 two sessions were held which focused on Priority 1 Protection and Restoration of Cultural Property and Priority 2 (Harnessing Living Heritage for a Sustainable Future) respectively. The second day of the meeting began with a technical session on shaping action-oriented outcomes for Priority 3 (Promotion of Cultural and Creative Industries and Creative Economy) followed by Priority 4 (Leveraging Digital Technologies for the Protection and Promotion of Culture). At the end of the

The meeting consisted of 4 sessions on each of the priority areas along with the opening and closing sessions. These sessions, spread over two days, detailed statements by G20 members, guest nations, international organisations and engagement groups on potential recommendations. On the inaugural day,

session, Hon'ble Minister of State for Culture and External Affairs Ms Meenakshi Lekhi addressed the delegates and dignitaries drawing attention to the importance of creativity, collaboration, and innovation as a harbinger of sustainability.

An exhibition titled 'Sustain: The Craft Idiom' was organised in Kala Bhoomi - Odisha Craft Museum during the meeting. The theme of the exhibition was reflective of the second priority of the Culture Working Group (CWG) - 'Harnessing Living Heritage for a Sustainable Future.' This specially curated cultural exhibition was inaugurated by the Hon'ble Chief Minister of Odisha Shri Naveen Patnaik; Hon'ble Union Minister for Culture, Tourism and DoNER Shri G. Kishan Reddy; and Hon'ble Minister of State for Home Affairs Shri Nityanand Rai.

The exhibition presented varied expressions of India's age-old living heritage and indigenous knowledge

systems that have sustained individuals, communities, and societies in shaping their beliefs, values, and traditions since time immemorial. 'Sustain - The Craft Idiom' showcased Akshara, Stambh and demonstrations by master artisans and teachers. Over 35 crafts and various languages and scripts of India through objects and live teaching demonstrations were presented during the exhibition. Foremost, the goal of 'Sustain' was to create awareness amongst visitors, professionals and policy makers about our living heritage practices, the mindful utilisation of natural resources, and the harmonious coexistence between humankind and nature.

The expression 'Culture Unites All' was formulated during the 1st meeting of the Culture Working Group at Khajuraho to highlight India's unwavering belief in multilateralism based on peaceful coexistence among diverse cultures and communities. Delegates from the G20 members, guest countries and international organisations came together on a shared platform and scribed 'Culture Unites All' in their respective native languages on a canvas - an expression of a united voice and a shared ambition.

'Culture Unites All' was launched as a campaign during the 2nd Culture Working Group meeting in Bhubaneswar, Odisha. Encapsulating the essence of 'Vasudhaiva Kutumbakam', the message of 'Culture Unites All' embodies a holistic vision for a collective sustainable future and universal well-being. For this campaign, Shri Sudarshan Patnaik, Padma Shri awardee created a sand art installation at the Puri Beach on May 14, 2023. This installation was inaugurated by Shri G. Kishan Reddy, Hon'ble Union Minister of Culture, Tourism and DoNER and Shri Arjun Ram Meghwali, Hon'ble Minister of State

# Think20 India Bridging the Ingenuity Gap

Samir Saran

President

Observer Research Foundation,  
Chair, Think20 Secretariat

India assumed its G20 Presidency in the midst of global flux. Post-pandemic recovery efforts were uncertain and uneven; the Ukraine crisis had resulted in supply-chain bottlenecks and consequent global stagflation; and the perennial onslaught of the "elephant in the room"—global warming and climate change—had only exacerbated the challenges.

While unveiling the logo and the theme, PM Modi posited the country as an architect for a forward-looking and result-oriented agenda for the world and the G20 as an exemplar of change, a vision for sustainability and growth, and a platform engaging with all that matters to the global south. Prime Minister's vision, of drawing on India's age-old ethic of Vasudhaiva Kutumbakam, strongly reiterated that inclusiveness and global cooperation would undergird India's G20 Presidency.

A framework of 4Ds delineates India's identification of its priorities as President—the promotion of decarbonisation, digitalisation, equitable development, and the de-escalation of conflict. This approach is reflected across the thematic areas of Think20 (T20) India—the G20's official Engagement Group for think tanks—which is often referred to as the "ideas bank" of the G20. The exchange of perspectives among high-level experts, research institutions, and academics that the T20 facilitates lends analytical depth and rigor to the G20's deliberations. The T20, thus, institutionalised what Thomas Homer-Dixon calls "ingenuity" or the "production of ideas", and helps bridge "the ingenuity gap", i.e. the critical gap between the demand for actionable, innovative ideas to solve complex challenges and the actual production of those ideas.

The 4Ds are closely oriented towards the achievement of the Sustainable Development Goals (SDGs). As such, these framing ideas or principles are reflected across the T20's seven Task Forces, which deal with 'Macroeconomics, Trade, and Livelihoods'; 'Our Common Digital Future'; 'Life, Resilience, and Values for Well-being'; 'Clean Energy and Green Transitions'; 'Reassessing the Global Financial Order'; 'Accelerating SDGs'; and 'Reformed Multilateralism'.

## Constitution of Think20 Task Forces

The echoes of 'Jan-Bhagidari' (or broad-based civic participation in governance) has underpinned the Indian President's efforts to take the G20 and its ideas to civil society, women, businesses, and civil societies such as the youth and women as essential partners in development and growth, the Mumbai Conference engaged actively with these target groups, and over 100 students from schools, colleges, and universities across Mumbai and Pune took part in the event. ■

Presided over 20 T20 events	Participated in over 125 policy briefs published since July 2023	Organized seminars and workshops on issues related to youth, gender and development, along with experts from various fields.	Convened a high-level dialogue with representatives from government, academia, civil society and business.
--------------------------------	---------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------

### T20 Publications

and published over 125 Policy Briefs (PBs) with many hosted over 50 events across the country and beyond of the Indian T20 crosses its mid-point, it has already hosted in Mysuru in August 2023. Moreover, as the term summit in Myanmer will be launched at the T20 India statements and will be drafted based on these into the G20 process, is being drawn up by the T20 Communique, a summary of recommendations. The T20 about the Task Force areas of engagement. The T20 the Task Force Statement, which are vision documents about the Task Force, areas of engagement. # Trade & Investment Working Group

## 2nd Meeting

MAY 23-25, 2023

**The 2nd meeting of the Trade and Investment Working Group (TIWG) concluded in Bengaluru with a collaborative roadmap to make global trade inclusive and progressive**

**T**he 2nd Meeting of G20 TIWG was held in Bengaluru, Karnataka from May 23-25, 2023. Over 75 delegates from G20 member countries, invitee countries, regional groupings and international organizations were present in India's Silicon Valley to discuss the 5th Priority Issue under India's G20 Presidency, WTO Reforms, and to continue the discussions from the 1st Meeting of TIWG meeting held in Mumbai from March 28-30, 2023.

On May 23, the first day of TIWG, a seminar on Technology and Trade was organized. The first panel discussed how technology is reshaping trade and the second panel discussed the transformative tools that can be utilized to revolutionize manufacturing and trade. Nearly 200 delegates and representatives from the technology sector and business community engaged on issues lying at the intersection of trade and technology.

The seminar was followed by a guided city tour organized for the G20 delegates. It covered architectural landmarks, including Bangalore Palace, Vidhan Soudha, Mahatma Gandhi Statue, Government Museum, the Museum of Art & Photography, and the Garden City's favourite Cubbon Park. The same evening, delegates enjoyed a cultural programme along with the gala dinner.

On May 24, the 2nd Meeting of TIWG was inaugurated by the Minister of State (MoS) for Commerce and Industry Smt. Anupriya Patel while delivering the keynote address, she opined that WTO Reforms are of utmost importance since WTO forms the backbone of the multilateral trading system. Shri Som Parkash, MoS for Commerce and Industry, who was also present during the inauguration ceremony added that in recent years, India has made significant progress in facilitating ease of doing business.

Concurrently discussions from the TITWG meeting held in Mumbai, five technical sessions were also organized in Bengaluru. These included, High-Level Principles for Digitalization of Trade Documents, Action Plan to Create Meta Information Portal for SMEs, Action Plan to Collectively Recognized the challenges faced by SMEs across member countries with respect to access to information. Many countries supported India's proposal for developing an Action Plan to address this challenge. There was also a broad consensus that G20 offers a remarkable opportunity to integrate SMEs in global trade by addressing information asymmetry faced by them.

The G20 members, invitee countries and international organizations broadly agreed on some of the benefits that included cost reduction, increased efficiency and improved transparency of the system. Several member countries also extended their support for framing principles to accelerate transition towards paperless trade.

### Compendium of Best Practices on Mutual Recognition Agreements (MRAs)

Some members expressed that the compendium on MRAs should be extended to broader service areas and called for greater cooperation. The deliberations highlighted that a compendium on MRAs can be beneficial for the sensitization of professional bodies in various countries towards the ongoing development in MRAs.

### G20 Regulatory Dialogue

Member countries acknowledged the benefits of having a regular dialogue and exchange of information on regulations that impact various areas of trade and

investment. India's G20 Presidency also assured that all the efforts would be made to make this dialogue focused on the most critical regulatory challenges that impact the international trade and investment ecosystem.

Chair of the Meeting, Shri Sunil Barthwal, Secretary, Department of Commerce said that the purpose of this working group meeting is to collaboratively work towards transparent, inclusive and development-oriented reforms that safeguard the interests of all members, particularly those of developing and least developed countries.

The 3rd Meeting of TIWG will take place in Kevadia, Gujarat from July 10-12, 2023. ■
